

10 Minute Heist

Rulebook

Game Design by: Nick Sibicky
Illustrated By: Denis Martynets

Story of The Wizard's Tower

The wise wizard Alazar is a collector of magical items. He keeps them locked up in his tower for fear of them ending up in the wrong hands.

Fortunately for a few scoundrels, Alazar has gone on an epic quest to vanquish the evil artificer, Styrn, and won't be back for quite some time. While Alazar is off saving the land, treacherous thieves can't pass up this great opportunity to steal all the valuable treasure hidden within the tower.

The thieves make wagers on who will get out of the tower first or who will escape with the biggest haul. One thief warns others of the cursed items within while secretly plotting to steal those items for their special powers. They gather their satchels, crowbars, and grappling hooks and make their way to The Wizard's Tower!

Overview

In 10 Minute Heist: The Wizard's Tower, you and your fellow thieves will steal as much loot as possible and compete to become the best thief in the land. The Wizard has many items for you to collect and you'll be rewarded for collecting the most of a certain type and the most of a certain value. There are many special cards with powers to collect, but be careful, because some items are cursed and you may lose points!

Online Tutorial

Components

17 Light Cards

Front

Back

40 Dark Cards

Front

Back

1 Balcony Tile

13 Scoring Tiles

Front

Back

1 Bridge Tile

5 Thief Tokens

If you are missing any of the listed components, email us at contact@dailymagicgames.com.

Setup

The following is the basic setup instructions for a 3-player and above game. After reading these setup instructions, see "Two Player Rules" on page 10 for 2-player setup and rules.

Before setup, Remove the 8 special cards with the  icon from the Dark deck and place them in the box*.

- 1 Place the Balcony tile near an upper left corner of the play area. Shuffle the Light deck, then deal 5 cards face-up next to the Balcony in a row. These 5 cards form the top floor in the tower. Deal 5 more cards face-up below the the top floor to form another floor in the tower.
- 2 Deal 1 Light card face-down to each player and return any remaining Light cards unseen to the box.
- 3 Shuffle the Dark deck, then using 5 face-up cards per floor, create 6 more floors. On the last (bottom) floor, deal the final card face-down so that it is secret from all players. There should be a total of 8 floors in the tower. Return any remaining Dark cards unseen to the box.
- 4 Place the Bridge tile in the lower right corner next to the bottom floor, then place the "1st to Exit" and "2nd to Exit" tiles between the pylons on the Bridge tile. Place the "Last to Exit" tile above the Bridge tile. Place the remaining Scoring Tiles near the tower where everyone can see them.
- 5 Each player selects a Thief pawn that will represent them in the game and places it on the Balcony tile.

The last player to win a game (of anything!) will be the starting player. See "Game Play" on page 6 to begin play.

After playing this basic setup version of the game, we recommend you play the game with the "Master Thief Variant" rules found on page 9 for a deeper game play experience.

*Use the second set of 8 special cards included in the game for a whole new strategy experience! To include these cards, remove the 8 cards marked with the  icon from the Dark Deck and include the 8 cards marked with the  icon before setting up the tower. After making this exchange, setup and gameplay will proceed as normal.

Concepts

Haul

Your Haul is any card in front of you. Your Haul must remain face-up and visible to all players throughout the game. Exception: The card you received during setup is kept face-down until the end of the game. You may look at this card at any time during the game.

Icons

There are 5 different Treasure Suits: Potion, Fossil, Artifact, Jewel, Tome. The Wild icon represents all 5 Treasure Suits.

Potion

Fossil

Artifact

Jewel

Tome

Wild

The following icons are used throughout the game.

Curse: A Curse placed upon you. Each Curse icon on cards in your Haul equals 1 Curse at the end of the game.

Prestige: The number on top of this icon represents that many Prestige points you have at the end of the game.

Value: The number on top of this icon represents the value of the item. A card may have different values.

Card Anatomy

Game Play

Game play begins with the starting player and proceeds clockwise. Each player takes a turn claiming a card in the tower and adding it to their Haul. To do this, take 1 card from any floor at the same level or below the location of your Thief pawn, then move your Thief pawn to the space vacated by that card. Add that card face-up to your Haul with the following caveat:

If the claimed card has a Power on it, that Power is done immediately.

If you claim the face-down card at the bottom of the tower, flip it face-up in to your Haul. If the claimed card has a Power on it, that Power is done immediately.

If you cannot complete the Power written on the card, you may not claim the card.

You may always move your Thief pawn sideways or downward to any card in the tower, even skipping floors if you like, but you may NEVER move upward.

To exit the tower, move your Thief pawn onto the Bridge tile on your turn. Once your Thief pawn is on the Bridge tile, you take no more turns until final scoring. A player may exit the tower at any time.

The first player to exit the tower by moving their Thief pawn onto the Bridge tile claims the “1st to Exit” scoring tile. The second player to move their Thief pawn onto the Bridge tile claims the “2nd to Exit” scoring tile. The last player to exit the tower receives the “Last to Exit” penalty scoring tile. Once all player tokens are on the bridge tile, the game is over and scoring begins.

Note: Some tiles are not used in the 2-player game! See the "Two Player Rules" on page 10.

Scoring

To begin scoring, all players reveal the card they've kept face-down throughout the game.

The “starting player” acts as the scoring moderator. She picks up the Scoring Tiles and one-at-a-time places them on the table and calls out what is being scored. Players look at their collected cards and determine who has the most of that particular category and the score tile is awarded to that player.

Treasure Suits: For Scoring Tiles that show a Treasure Suit icon, players total the Value of all cards they have with that same icon. Some cards can have more than one Treasure Suit and will count separately for each Treasure Suit on the card. Some cards can count for ALL treasure suits and will have a  on the card.

Example: Katrina counts the Value on all of her  cards. She has the Sprig of the Dawn Tree worth 3, The Scrying Bowl worth 6, and the Mirror of Sorrows worth 7. She also has the Celestial Tarot which gives her a  worth 2. Her total Value comes out to 18.

Value Sets: For Scoring Tiles that show a Value (3, 4, or 5), players count the quantity of cards they have that show that same number. Some cards can have more than one number and will count separately for each number on the card.

Example: Katrina counts all of her cards with a Value of 3. She has the Sprig of the Dawn Tree, Orion's Bestiary, and Love Potion #8. She also has the Haunted Nesting Dolls which counts as a card with a Value of 3, 4, and 5. Her total number of cards with a Value of 3 is 4.

Curses: For the Curse Scoring Tiles, players count the quantity of  icons on all of their cards and compare totals.

Example: Katrina has the Celestial Tarot and the Haunted Nesting dolls that have  icons. She has a total of 2.

If two or more players tie for any category, that score tile is turned face-down and is not awarded.

This also includes ties for the  tiles.

When all of the Scoring Tiles have been assessed, players add up the  on Scoring Tiles they've been awarded and any found on cards in their Haul. The player with the highest score wins!

If two or more players tie for highest score, then the player with the fewest curses is the winner. If the tie persists, the player with the most Scoring Tiles is the winner. If the tie still persists, players rejoice in their shared victory!

Master Thief Variant

We highly recommend that you play this variant for a deeper game play experience after you've played the basic setup. This variant introduces a draft which gives some players insight into what opponents may be hiding as their face-down card and adds an element of bluffing to the game.

During setup, after shuffling the Light deck in step ①, remove 1 card in a 4-5 player game, 2 cards in a 3-player game, or 3 cards in a 2-player game and return them unseen to the box.

Skip step ② and set the remaining Light deck aside.

Proceed with step ③ and build the entire tower. Now that all players can see what is in the tower, take the leftover Light deck and give them to the “last player” (i.e. the player sitting directly to the right of the starting player). She looks at the cards, selects one card of her choice, and places it face-down on the table in front of her. Then she passes the remaining cards to the player on her right. Each player drafts a secret card in this manner to start their Haul. When the starting player has chosen her secret card the remaining 2 cards (or 1 in a 5-player game) are returned unseen to the box.

The rest of the gameplay is as normal.

Two-Player Rules

There are some additional special rules when playing with only two players.

During setup, leave the “2nd to Exit,” “Last to Exit,” and “Fewest  Scoring Tiles in the box; they will not be used.

On your turn, after you claim a card and move your Thief token, you are REQUIRED to discard a card from that same row, if possible. Place the discarded card from the tower back to the game box. Any card, including the face-down card in the bottom floor, can be discarded in this manner.

Example: Katrina claims the Basilisk Fang and moves her Thief token to that spot. She then discards the Gibbon's Paw on the same floor as her Thief token, reducing the likelihood that Nick will be able to outscore her on  cards.

The rest of the gameplay is as normal.

Appendix: Special Card Notes

These notes serve to help clarify certain situations involving the special cards. For any questions not covered here, feel free to email us at contact@dailymagicgames.com.

Amulet of Nae: When you choose this card, you must discard a card from the tower and place it back into the box. This card can come from any row and even include the final face-down card in the tower. Note: if the final face-down card is chosen, return it to the box unseen. If there are no cards left in the tower, than this part of the text may be ignored. After choosing the discard, place the Amulet of Nae in any other player's Haul. If this card is taken as the final face-down card, it is immediately revealed to all players and then executed as normal.

Haunted Nesting Dolls: This card counts as a 3, 4, and 5 when evaluating number sets during endgame scoring. It does not increase any treasure suit values.

Radiant Hamsa: This card counts as a single “5” for endgame

scoring. Additionally, when comparing total  for endgame scoring, this card reduces your total  by 2. Note: players with a  value less than 0 are considered to have exactly 0  for scoring purposes (and would thus tie other players at 0).

Sand of Illusion: When you take this card, you must immediately place it under a face-up 3, 4, or 5 card that is already in your Haul. It counts as a duplicate of that card during endgame scoring for both Treasure Suits as well as Values (e.g. duplicating a Book of Spells would add an additional “5” Value and 5  when counting that Treasure Suit). If Sand of Illusion is taken as the final face-down card, it is immediately revealed to all players and then executed as normal.

Serpent’s Hourglass: This card increases all of your Treasure Suits by 1 during endgame scoring. Additionally, when you take this card, you must immediately take another turn. If this card is taken as the face-down card, it is immediately revealed to all players and then executed as normal.

Tales of Myth & Magic: This card adds 6 to both the  and  Treasure Suits during endgame scoring. In order for you to claim this card, you must discard a card that does not have a  icon from your Haul. If you do not possess any face-up non- cards in your Haul, you cannot claim this card.

Thief’s Portal Cloak: This card allows you to take ANY card from the tower without moving your Thief token to that card. This card can come from below or above your current location.

Special Thanks: The designer would like to thank all kinds of people but he’s too busy with his baby to write anything here at the moment. Stay tuned!

Quick Play Guide

- 1 Place the Balcony tile near an upper left corner of the play area. Shuffle the Light cards and create 2 floors of the tower by dealing out 5 cards face-up in a row to each floor.
- 2 Deal 1 Light card face-down to each player and return any remaining Light cards unseen to the box.
- 3 Remove the  or  cards from the Dark deck. Shuffle the Dark cards and create 6 more floors of the tower. The final card in the tower must be face-down. There should be a total of 8 floors in the tower. Return any remaining Dark cards unseen to the box.
- 4 Place the Bridge tile in the lower right corner next to the bottom floor, then place the Scoring Tiles.
- 5 Each player selects a Thief pawn that will represent them in the game and places it on the Balcony tile. The last player to win a game will be the starting player.

Game play proceeds clockwise. Each player takes a turn claiming a card in the tower and adding it face-up to their Haul. Move your Thief pawn to the space vacated by that card. If the claimed card has a Power on it, that Power is done immediately.

Scoring begins when all Thief tokens are on the Bridge tile. All players reveal the face-down card they received during setup. Pick up Scoring Tiles one-at-a-time and announce the Scoring Tile to be awarded. Players look at their Haul and determine who has the most of that particular category. The Scoring Tile is awarded to that player. When all of the Scoring Tiles have been assessed, players add up their their . The player with the highest score wins!
